

For those who live in Arizona, I believe, in the last five quarters, we have had a couple of quarters where we have had the fastest-growing income in the entire country, and it is not the folks at the top.

What happens when you have a country that has more jobs than available workers? For those who follow numbers, if I had come to this room a couple of years ago and said we are going to blast beyond 63 percent labor force participation when all the models said we would be a couple of points below that and continue to fall—there are amazing things happening out there.

You would think there would be a little joy for a body that claims we care about working men and women, for a body that claims we care about those who have had a really rough previous decade. You would think there would be joy in this body.

Look at the math. Look at the fascinating things when—okay, we will get the unemployment numbers—what?—this coming Friday. Look at something that is called the U-6 data, and then start to see these fascinating numbers out there, when you get some of the really broad data on how many of our friends and neighbors who have developmental issues, handicaps that have been barriers for them to participate in the workforce. They are moving into the workforce because businesses are so desperate for workers that they are making accommodations. You would think that creates a little bit of joy.

Is that Republican or Democratic? It is American. We should be joyful.

When we see the numbers of Hispanics, African Americans, women, these other populations, all of these subgroups that we love to break up our math into, all of them are record highs, tied for record highs. Why isn't there joy?

When you look at what has happened to wages, why isn't there joy?

The reality is that the economic expansion that is helping so many of the working men and women in this country also means your government has had the highest receipts—*income*—in U.S. history, blowing the wheels off of all the predictions, proving the sort of Malthusian, malcontents were wrong. Something is working out there.

Why isn't this body fixated on figuring out what is working and doing more of it? Instead, Congress has now become a place where we do public policy by feelings instead of a calculator.

As my father used to say—and I am terrified I am quoting my father—my father used to say, “The math always wins.” Madam Speaker, the math always wins.

Madam Speaker, I yield back the balance of my time.
